DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 7/15/2003 has been considered and placed in the application file.

Response to Amendment

2. The amendment filed 8/5/2003 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The specification does not support a bone fusion implant containing a combination of bone morphogenetic protein and a fusion promoting material other than bone and other than bone morphogenetic protein in a hollow interior of the bone fusion implant.
3. Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 54-103 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed,

Art Unit: 3731

had possession of the claimed invention. The specification does not disclose a bone fusion implant containing a combination of bone morphogenetic protein and a fusion promoting material other than bone and other than bone morphogenetic protein in a hollow interior of the bone fusion implant.

6. Claims 54-103 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a fusion implant device coated with a fusion promoting material, does not reasonably provide enablement for a bone fusion implant containing a combination of bone morphogenetic protein and a fusion promoting material other than bone and other than bone morphogenetic protein in a hollow interior of the bone fusion implant. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 3731

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
